The 13th Basic Microsurgery Course

July 9-13, 2012

Department of Orthopaedics & Traumatology
The Chinese University of Hong Kong

Introduction

The basic microsurgical Course focuses on a higher level of basic skills in microvascular surgery by means of intense laboratory practice.

It consists of 22 hours laboratory practice over 5 days in the "Clustered Course" structure. The course has a fully structured programme: starting from the basic suturing technique to free flap transplantation with step by step instructions demonstrated by videos and a course manual.
