

## Report

Name: Training Period: November 15 - December 16

Dr. Yumiko Hirayama

Please list out 3 advantage & disadvantage of this fellowship program:

Advantage 1: I watched how to use Navigation system and some other instruments for a variety of cases.

Advantage 2: I could join many operations (total 40 cases) <sup>now</sup> and get many ideas from experienced doctors.

Advantage 3: I could attend many interesting workshop and I could met many specialists.

Disadvantage 1:

Advantage 4 I could find that English is essential.

Disadvantage 2:

I am sorry, but I can not find any disadvantage.

Disadvantage 3:

Please feel free to write down your comments for this program:

I am much pleased with this program.

I am interested in orthopaedics surgery, especially trauma, so this program was exciting and valuable for me.

I must apologize to you that you had difficulty talking with me because of my poor English, but all of doctors let me have joined operations friendly and they ~~was~~ kindly repeated or wried to explain to me.

I am very happy to spend such a wonderful time in Hong Kong.

Thank you very much.

Please give us a brief report for this trauma fellowship program:

I really appreciate your kindness in my visit. I am happy to be given such a wonderful program. I cannot forget these experiences and all of you.

I would like to report about main four things of this program.

(① Emergency Operation ② Ward round ③ Out patient clinic. ④ Workshop)

#### ① Emergency Operation

I was able to join many Emergency operations total over 40 cases, and then operators showed me some new techniques. It was very exciting and interesting for me. They also showed and told many basic good skills for me. These skills are very important for me because my experience of ~~my~~ surgery is very short and poor. I will never forget them and turn this experiences to advantage in the future.

#### ② Ward Round

On weekdays I joined ward round every morning and sometimes I joined patient's presentation. Actually I had a little difficulty about English, so I found English is essential to communicate with people in all over the world. I will learn hearing and talking English harder.

#### ③ Out Patient Clinic

I was able to join Out Patient Clinic twice. The relationship between doctors and patients seemed to be friendly.

It was surprised that there were some assistants and they put patients on cast, because ~~we~~ there are no assistants in our hospital in Japan. Their skills ~~was~~ to my advantage because we usually do it not so well.

#### ④ Workshop

I had many kinds of workshop this time fortunately.

Then I was able to have many attractive lecture and demonstrations.

Some doctors kindly asked me to attend unscheduled meeting ~~with~~ so I could meet many experienced doctors including Japanese doctors. I am happy to meet them.

This program is wonderful for me. I cannot possibly put my thanks in words. Our boss, Dr. Naito also thanked all of you.

I would like to come Hong Kong again some time - after I learn English more. Thank you very much.

Yumiko Hiramatsu
